

About us

Our breast imaging services offer high-quality care and use advanced technology to improve early cancer detection.

We support patients in their breast health journey and recommend:

- Talking to your doctor by age 30 about having a risk assessment and any family history of breast, uterine, or ovarian cancer.
- Scheduling an annual breast screening with 3D mammography beginning at age 40.
- Understanding your breast density and additional screening options.
- Adding SecondReadAI to your mammogram for more confident results.

A second, detailed review
of your mammogram

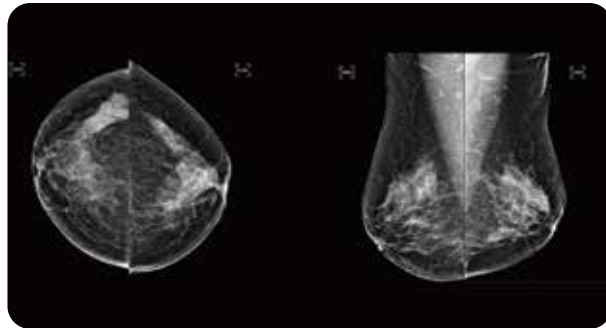

A second digital analysis

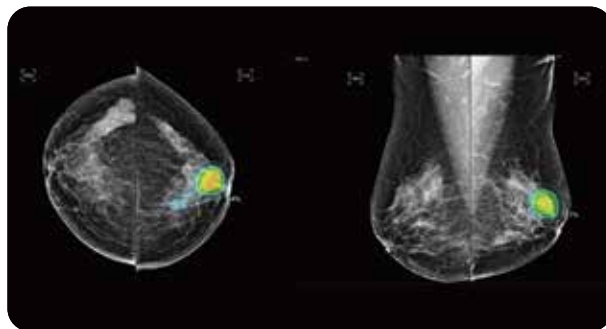

SecondReadAI is an AI-powered software that analyzes mammogram images and alerts the radiologist of suspicious areas. Serving as a valuable second opinion, SecondReadAI provides another layer of scrutiny and detects abnormalities that might not be visible to the human eye.

See the difference!

Radiologist review – Overlooked

SecondReadAI review – Abnormality found

Proven performance

Having a mammogram may cause some patients anxiety, but early detection is essential for better outcomes. Every patient wants to feel confident in the accuracy of their mammogram.

Patients may achieve more assurance in their results as clinical studies show these benefits:

- Increases early-stage cancer detection up to 15%.* +
- Improves evaluation of dense breast tissue.* +
- Reduces unnecessary biopsies.* +

+ INSIGHT MMG

Invest in your health

SecondReadAI is not currently covered by insurance. Knowing you are in good health and having peace of mind are priceless. Choosing to enhance your mammogram with AI technology can help you gain greater confidence in your mammogram results.

SecondReadAI is an optional, self-pay service any patient can request to add to their mammogram.

No additional imaging or appointment time is required and any findings are included in your mammogram report.

Next steps

Proactive care is a smart choice to help catch issues early. Adding SecondReadAI to your mammogram may identify a concern sooner to help you stay ahead of cancer.
